1. The following is an examiner's statement of reasons for allowance: the amendment filed 6/2/2005 to the present invention has overcome the prior art of record. The prior art of record fails to teach or fairly high bias voltage generator includes a mechanism for adjusting the high bias voltage, low bias voltage generator includes a mechanism for adjusting the low bias voltage in combination with adjusting RC time constant for the feedback signal so that the time constant for the feedback signal is significantly larger than the time constant for the transmitted signal from the capacitive transmitter pad, thereby ensuring that the feedback signal does not mask transitions of the transmitted signal as called for in claims 1, 8 and 15. Therefore, claims 1-2, 5-6, 8-9, 12-13, 15-16 and 19-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
